AutoCAD

"AutoCAD, the most popular and fastest-selling product in Autodesk's history, has received rave reviews since its debut, both from users and from the computer press." - James Borowy, lead editor

of the New York Times. "One of the hottest new home computers in 1983 was the Apple II." - Thomas A. Stewart, editor-in-chief, Byte, the magazine of the Byte Group.

"There is no better drafting software than AutoCAD. AutoCAD is the best, most reliable, and fastest drafting system for a desktop PC." - Michael Gonsher, technical editor, Byte, the magazine of the Byte Group.

"AutoCAD is a winner in every department. Graphically, it is more than equal to the most advanced

drafting programs for business machines. Programmatically, it has many advantages. Autodesk is the leader in CADD. AutoCAD is a model." - Frank H. Robinson, President, The Arthur Anderson Company. "AutoCAD was named the best product of 1983 and as a user who has used it for the past five years, I'd have to agree." - Larry Rosen, senior vice president, New York City Savings Bank, The Bank of New York "AutoCAD is a great product." - Ron K. Pickart, President, International Associates,

Inc. "Autodesk AutoCAD is one of the most popular products I've ever seen." - Peter Deutsch, founder,

Deutsch, Inc. "AutoCAD is probably the best known and best-selling CAD/CAM software. It is powerful, powerful enough for medium-sized engineering and design projects and just right for small ones." - Leslie Horn, chairman, Haloid Imaging, Inc.

"You need AutoCAD, if you are doing any CADD." - Donald R. Stickney, chairman and CEO, The Stickney Corporation. "AutoCAD

is the most successful of all its products. In the field of computer-aided design, it has moved the industry forward. No one can deny

AutoCAD's influence on the industry. It is a product that will undoubtedly continue to grow in stature and importance." - Hal E.

Boltz, Jr., chairman, Electronic Services Division, The Dana Corp.

"AutoCAD is one of the most successful products in the history of computing." - Yury G. Zand,

2D The AutoCAD "Classic" 2D software has been improved with AutoLISP in the form of a Visual LISP script. Versions This is a list of software releases of AutoCAD. For details about the development of AutoCAD, see the Autodesk Developer Network for the full history. AutoCAD 2010 AutoCAD 2010 was released on August 26, 2009 and has been developed for Mac OS X and Windows. Its main features include more powerful editing tools and a revised user

interface. It has about a year and a half's development time, from when the first prototypes were being built. AutoCAD 2010 Release Notes AutoCAD 2010 - New Features Modeling Revised workflow and interface: the ability to work in a paperless design environment, enhanced workflow, improved path creation and editing tools, an optimized drawing browser. Constraint tools: geometry constraint tools were added, as well as the ability to produce a clean cut when creating and joining surfaces.

Creation and editing of custom tools: The ability to create and edit custom tools, which can be assigned to any feature. Improved basic design tools: the ability to design on paper or on a drawing with the same features. Revised print layout tools: the ability to print parts of a drawing in one operation. This invention relates to thermoplastic adhesives and more

particularly to thermoplastic adhesives that contain polybenzoxazoles.

Polybenzoxazoles are often used as the sole or as one of a family of resin compositions for use in the adhesive or coating industry, for example, in packaging films and laminates. Such resin compositions contain two general classes of monomers: (1) acrylate or methacrylate esters, and (2) heterocyclic dicarboxylic acid monomers, such as pyridinone, imidazole, oxazole, and other

polyheterocyclic carboxylic acid monomers. Examples of representative patents disclosing these compositions and uses are U.S. Pat. Nos. 4,454,248; 4,526,879; 4,853,472; 4,857,535; 4,897,457; 4,939,202; 4,968,716; 4,978,902; 5,021,509; 5,066,764; 5,071,841; 5,124,430; 5,124,431; and 5,159,074. U.S. Pat. Nos. 4,897,457 and 4,939,202 and European Patent Application 0 659 329 disclose the use of polybenzoxazole as a thermoplastic adhesive for use with PVC. U.S.

Pat. No. 4,857,535 describes the adhesion of polybenzoxazole to vinyl, polyethylene and polypropylene. U.S. Pat. No. 5,125,981 describes the use of polybenzoxazole as an adhesive for use in the adhesive layer of laminates. U.S. Pat. No. 5,124,431 describes polybenzoxazole as an adhesive for use with polypropylene films. U.S. Pat
