tasks You can opt for converting a single PowerPoint presentation to EXE file format. The process can be easily accomplished by providing information about the input file, specifying the saving directory, and setting the filename. In addition, you can make the application generate an AutoRun file for a VCD/DVD and import additional files required by the current PowerPoint presentation, like songs, videos, and other linked items. Batch actions can be employed in order to process multiple files at the same time. You may create a list with the files that you want to convert, check out details about each item (e.g. file path, full name, and size), remove items or clear the entire list, as well as provide the saving directory. Other notable configuration settings worth being mentioned enable you to assign icons (ICO file format) to the output files, show a custom photo (e.g. PNG, GIF, JPEG, BMP, ICO) before the presentation (the picture may be closed automatically after a custom number of seconds), as well as display a picture at the end of the presentation. Tests have pointed out that PPT to EXE Converter Activation Code carries out a task quickly and without errors.
